SAP Silver Partner

Overview

The Vnomic SAP on Azure hardening solution is a cutting-edge offering that redefines the security and performance standards for SAP systems on the Azure platform. This solution is the culmination of Vnomic's sophisticated automated and engineered SAP landscape delivery and management services, designed to ensure that SAP systems are not only secure but also operate at peak performance.

Key Features

1 **Automated and Engineered Hardened SAP Landscape Delivery:** Vnomic's solution leverages state-of-the-art automation and engineering to deliver Hardened SAP landscapes that are optimized for performance and security. This approach ensures rapid deployment and seamless integration of secure SAP systems within the Azure environment, minimizing downtime and maximizing efficiency.

2 **Advanced Hardening for Optimal Security**: Vnomic goes beyond the standard offerings in SAP systems by engineering solutions that meet the most advanced hardening criteria. This level of hardening provides an extra layer of security, protecting systems from emerging threats and vulnerabilities.

3 **CIS Hardened Systems**: At the heart of Vnomic's solution are the highest level of CIS Hardened systems. These systems exceed the security capabilities of base SAP systems by adhering to the CIS Level 1 requirements. The CIS level 1 benchmarks are established by a global community of IT experts and represent the gold standard in system security configurations.

4 **Global Standards Compliance**: The solution ensures compliance with SAP, Microsoft, and CIS Level 1 best practices. This global standards compliance guarantees that the systems are aligned with the latest and most rigorous requirements in security and performance.

5 **Global Availability and Accessibility**: Vnomic's CIS Hardened SAP systems are available globally, providing businesses around the world with access to top-tier security solutions. This global reach ensures that organizations can easily integrate these solutions into their existing Azure infrastructure.

6 **Comprehensive Global Service and Support**: Vnomic offers extensive global service and support, with a presence in the US, Europe, and India. This support structure ensures that users of the Vnomic SAP on Azure hardening solution receive timely and effective assistance, enhancing the reliability and effectiveness of the solution.

Benefits

- ✔ **Enhanced Security**: With advanced hardening and adherence to CIS benchmarks, businesses can be confident in the superior security of their SAP systems.

- ✔ **Streamlined Deployment**: The automated and engineered hardened SAP landscape delivery minimizes setup time and complexity, leading to quicker and more efficient system deployment.

- ✔ **Operational Excellence**: Compliance with SAP, Microsoft, and CIS best practices ensures secure, high performance and reliability of the SAP systems.

- ✔ **Global Accessibility**: The availability of the solution in various regions allows organizations worldwide to benefit from Vnomic's advanced SAP on Azure hardened solutions.

- ✔ **Robust Support Network**: With a comprehensive global service network, Vnomic ensures that any issues are promptly addressed, providing peace of mind to its customers.

Conclusion

Vnomic's SAP on Azure hardening solution represents a significant advancement in the realm of SAP system security and performance. By combining automated and engineered delivery, advanced hardening techniques, and adherence to global standards, Vnomic provides a robust, efficient, and highly secure solution for SAP systems on Azure. This solution is an ideal choice for organizations seeking to enhance their SAP system's security and performance on the Azure platform.
